

Erik & Katy Scott

Representing Bryan & College Station

We treat every transaction honorably and each customer with sincerity, kindness and understanding. Working with us, you get the benefit of two unique individuals with one huge servant's heart.

WHAT SETS US APART:

- A Husband-and-wife Real Estate team with over 45 years combined experience.
- As a United States Marine, Erik will work tirelessly for you and your family's best interest. He is calm and detail oriented, the type of man you want standing by your side.
- Katy has a degree in Communications and a minor in Interior Design. She specializes in the marketing and nurturing side of the business.
- Real Estate is in our blood, as we were both raised by parents in the business.
- Erik served our country and has been a Realtor over 20 years with experience in residential, commercial, and farm/ranch transactions.
- Katy has been a licensed agent since 1997 and a Broker since 2001. She started her real estate career at Houston's prestigious Greenwood King Properties.
- Erik and Katy have lived and worked full time in the Brazos Valley for 25 years. They live in College Station and are recent empty nesters. They have two grown children. Libby is a recent graduate of Texas State University and is getting married this year. Foster is a Freshman at Texas A&M University.
- Erik & Katy are 8th & 9th generation Texans. They know Texas Real Estate!
- Erik grew up in the River Oaks neighborhood of Houston. Katy spent her childhood in Austin's Tarrytown and her high school years in the West University neighborhood of Houston. They know luxury, because they grew up in some of Texas' most established high-end neighborhoods.
- Erik & Katy serve the community in several leadership positions and on local Boards, including the College Station ISD Education Foundation. They are involved in our local VA, and because of the extreme premature birth of both of their children, they were instrumental in bringing Ronald McDonald House Charities to the Brazos Valley. They know the ins-and-outs of area hospitals and maintain an informed relationship with the medical community.
